Student Name: Chetan Ingale PRN No.: 221111030

Course Name: C.S.E. (IoT CS BC)

Course code: CSL301

Year: S.E. Semester: 3

Roll No.: 17

Experiment Evaluation Sheet

Experiment No.: 2

Experiment Name:

Write a program to implement the concept of Stack with Push, Pop, Display and Exit operations.

Sr No.	Evaluation Criteria	Marks (Out of 9)	Performance Date	Correction Date and Signature of Instructor

Code:

```
#include <stdio.h>
#define MAX_SIZE 100
struct Stack {
  int data[MAX SIZE];
  int top;
};
void initStack(struct Stack *stack) {
  stack->top = -1;
int isFull(struct Stack *stack) {
  return stack->top == MAX_SIZE - 1;
int isEmpty(struct Stack *stack) {
  return stack->top == -1;
void push(struct Stack *stack, int value) {
  if (isFull(stack)) {
     printf("Stack overflow: Cannot push element %d\n", value);
  } else {
     stack->data[++stack->top] = value;
     printf("Pushed %d onto the stack.\n", value);
  }
}
int pop(struct Stack *stack) {
  if (isEmpty(stack)) {
     printf("Stack underflow: Cannot pop element.\n");
     return -1;
  } else {
     int value = stack->data[stack->top--];
     printf("Popped %d from the stack.\n", value);
     return value;
  }
}
void display(struct Stack *stack) {
  if (isEmpty(stack)) {
     printf("Stack is empty.\n");
  } else {
     printf("Stack elements: ");
     for (int i = 0; i \le stack > top; i++) {
       printf("%d ", stack->data[i]);
     printf("\n");
  }
}
int main() {
  struct Stack stack;
  initStack(&stack);
  int choice, value;
  do {
     printf("\nStack Operations\n");
     printf("1. Push\n");
```

Data Structure Lab

```
Code:
      printf("2. Pop\n");
      printf("3. Display\n");
      printf("4. Exit\n");
      printf("Enter your choice: ");
      scanf("%d", &choice);
      switch (choice) {
         case 1:
            printf("Enter the value to push: ");
            scanf("%d", &value);
            push(&stack, value);
            display(&stack);
            break;
         case 2:
            pop(&stack);
            display(&stack);
            break;
         case 3:
            display(&stack);
            break;
         case 4:
            printf("Exiting the program.\n");
            break;
         default:
            printf("Invalid choice. Please try again.\n");
    } while (choice != 4);
    return 0;
```

Data Structure Lab

Conclusion:

Through this experiment we have learnt about how to implement an Stack using the C language. Various operations like push, pop, isfull, and isempty are applied on the stack.

This experiment helps us in using stacks as a data structure for further reference.
